 ProGlove

INSIGHT Standard

Easy device integration

Create your INSIGHT account and begin connecting your scanners to INSIGHT software. Our plug-and-play connectivity solutions make it easy to pair and manage your devices using the INSIGHT Mobile Android application, INSIGHT Mobile iOS SDK, or Gateway to cover the rest.

Configuration tailored to your needs

ProGlove devices can be manually configured to your scanning process. Integrating your shop floor layouts, warehouse workflow rules and processes is easier than ever. Scan a barcode or utilize your MDM system to update and apply the best configuration setting to your devices.

Deploy with the latest downloads

Download your way to more reliable operations. No more searching for the latest firmware version. Stay up to date by manually improving the functionality and firmware version of your devices.

Free with every ProGlove wearable scanner

INSIGHT Standard

- Create your INSIGHT account & begin **integrating** ProGlove devices
