

# PROGLOVE

## Transform ProGlove Scanners with enhanced features!

Capture **up to 10x more** barcodes using Advanced Scanning!

**Simplify** multi-barcode labels and eliminate wrong barcode scans.

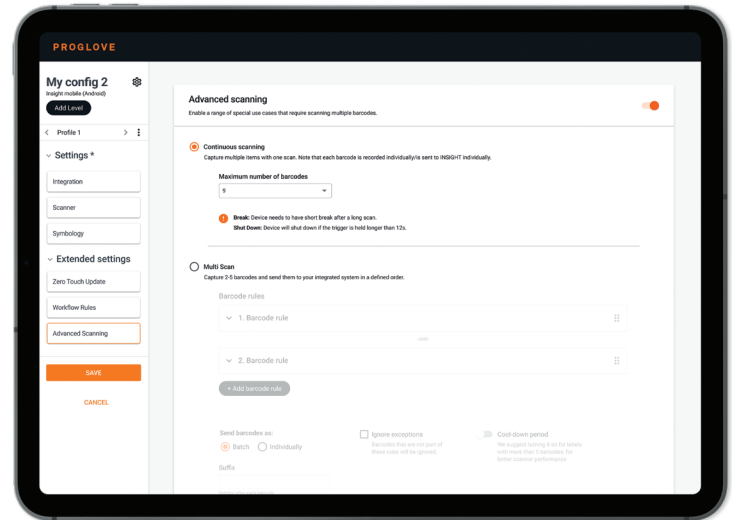

Choose from **Multiscan** for accuracy & control, or **Continuous** Scanning for speed & volume.

*\*Includes INSIGHT software features: Visibility, Standard.*

# INSIGHT Productivity

Increase shop floor productivity with enhanced feature add-ons for ProGlove Wearable Scanners.

# INSIGHT Productivity

Take scanning to new volume highs using dynamic feature add-ons for boosting warehouse productivity. Capture more barcodes, simplify complex multi-barcode labels scanning & eliminate wrong barcode scanning.

## Advanced Scanning

Advance into multiple barcode scanning and begin capturing up to 10x more barcodes in each scan. Adding the Advanced Scanning feature to ProGlove scanners is as easy as selecting configuration types in INSIGHT software. Advanced Scanning comes with 2 scanning modes to choose from.

### Multiscan mode

For those a bit more precise when it comes to their multiple barcode scanning accuracy. Multiscan provides more accuracy over batch scanning barcodes from a single item. Only the preselected 5 barcodes are transmitted into your WMS or ERP application, in the defined scanning order.

### Continuous Scanning mode

Designed for speed and volume, Continuous Scanning enables scanners to capture up to 10 barcodes in rapid succession, in the order they are scanned. By holding the trigger and hovering scanners over multiple barcodes, operators are able to capture barcodes in a single scan. These barcodes are then transmitted to your WMS or ERP system with no predefined rules.

## INSIGHT Standard

- Scanners, Gateways, Mobile applications
- Deploy with the latest downloads
- Included with every ProGlove wearable scanner

## INSIGHT Visibility

- Monitor device usage & battery status
- Update device fleet configurations & software versions
- Track lost devices & avoid costly scanner replacements

## INSIGHT Productivity

- Advanced Scanning for **multiple barcode scanning**
- Multiscan mode for **5x more preselected barcodes**
- Continuous Scanning mode for any **10 barcodes**

## INSIGHT Analytics

- Discover errors by converting raw data into action
- Analyze with automated reports
- Act & enhance shop floor integrations with more process context
